

FACTORY SANITATION

THE BEST INTERCHEM ITALIA PRODUCTS FOR CLEANING FACTORIES.

The different spaces of factories need a thorough cleaning with specific products, ideal for removing dirt and sanitizing machinery and worktops.

1 CLEANING PRODUCTION AREA

Machinery

Worktop

Warehouse floor

Production area floor

Once the working day is over it is essential to clean the machinery used in the production area, eliminating any encrustations of dirt, but also sanitizing the surfaces for the next working day.

ARGONIT SGRASSATORE CON IGIENIZZANTE

A Ready-to-use fast degreasing detergent with sanitizing agent that is ideal for removing dirt from any washable surface.

Floors must be treated adequately as often residues of raw materials and scraps end up on the ground, creating encrustations of dirt and the passage of carts elevator contribute to staining the floor with oils and rubber residues.

In this case, two floor cleaners are recommended:

UNILUX

Detergent suitable for washing any water-resistant surface, tool, machine, etc. by hand or with a floor-washing machine.

ARGONIT P 4000

Great for eliminating residues of organic and mineral origins.

2 CLEANING RESTROOMS

Restrooms

Changing rooms

When you have cleaned the production area and warehouse it is necessary to sanitize restrooms and changing rooms.

PULIGEN LIGHT

Ready-to-use scented descaling detergent for instantly removing - in one go - limescale, greasy and soapy residue from all washable bathroom surfaces.

3 PREVENTION

hands

surfaces

handles

An adequate **prevention** procedure, with the correct use of sanitizing products for hands and surfaces is recommended in order to maintain a **safe working space**. Interchem Italia advises:

OXALIS DUO

Ideal for **sanitizing** hands, handles and in general all objects which are used by more people.

OXALIS SANI GEL

Sanitize your hands and **eliminate bad smells**.
